PETRA

LANDSCAPING

Design. Build. Maintain.

SERVING THE GREATER TORONTO AREA & DURHAM REGION
PETRALANDSCAPING.CA • 647-517-3872

Great landscaping starts **below** the surface.

Proper excavation, base preparation, drainage, and grading are what make a project look as good in year ten as it does on completion day. We build the part you never see with the same care as the part you do — because one holds up the other.

01 — ABOUT US

A local team that treats your property like our own.

Petra Landscaping designs, builds, and maintains outdoor spaces across the Greater Toronto Area and Durham Region — from a single driveway to a full property transformation.

We were built on a simple promise: high quality at a fair price, delivered by a team that shows up, listens, and does the job right. We start by listening, then design around how you actually want to use your space, build it with premium materials and proper groundwork, and stand behind the result. One team stays accountable from the first visit to the final walkthrough.

Every home is different

We design to your lot, your grade, your drainage, and the way you actually live outdoors.

Every design is custom

No copy-paste layouts. Materials and patterns are chosen for your property, not a catalogue.

Every project is earned

Much of our growth comes from referrals. We treat that as a responsibility, not a metric.

Design. Build. Maintain.

The Vision

To set the gold standard for landscaping across the GTA by combining technical expertise with exceptional client service — enhancing outdoor living by creating spaces people are genuinely proud of.

Our Commitment

To raise the standard for residential hardscaping by pairing practical expertise with thoughtful design. Outdoor spaces should be functional, durable, and feel like a natural extension of your home.

Built on Process

We don't rush projects or cut corners. From the initial consultation to the final walkthrough, our team follows a structured approach — so you always know what comes next and what it costs.

Shaped by Experience

Years in the field let us solve problems efficiently and execute with confidence. Our goal isn't just to finish projects — it's to deliver results homeowners feel confident recommending.

The Petra **standard.**

Six commitments that apply to every project we put our name on, whatever the size.

01

Fully Licensed & Insured

Every project is covered and every crew is qualified, so you are protected from the first visit to the final walkthrough.

02

Free On-Site Estimates

We come to you, measure properly, and quote with no surprises. The estimate is detailed, honest, and free.

03

Premium Materials

We build with trusted supplier products, so your project looks the part and lasts the part.

04

Honest, Upfront Pricing

High quality at a fair price. You see the full scope and cost before any work begins, with no hidden extras.

05

Year-Round Service

From spring builds to winter snow clearing, we keep your property looking its best through every Ontario season.

06

GTA & Durham Coverage

From Toronto across to Oshawa and Clarington, we bring the same standard of craft to every neighbourhood.

Four steps, **zero** surprises.

From the first visit to the final walkthrough, you always know what comes next.

01 Free Consultation

We visit your property, listen to your goals, and talk through what is possible for your space and your budget.

02 Custom Design & Quote

You get a clear design direction and a detailed, honest quote — full scope, full cost, no hidden extras.

03 Expert Installation

Our crew builds with precision and care, keeping the site tidy and keeping you informed at every stage.

04 Final Walkthrough

We walk the finished project with you to make sure every detail meets the Petra standard before we call it done.

Led from the **field**, not the office.

Petra Landscaping is led by professionals with years of hands-on experience in excavation, grading, drainage systems, and custom interlocking.

Our leadership team understands what goes into a properly built foundation — because they have spent years building them. Experience in the field is what allows us to spot a drainage problem before it becomes a callback, and to execute with confidence when a site throws up a surprise.

That experience is also why the person quoting your project is the person accountable for it.

Jacob D.

FOUNDER

Expertise where it counts

Excavation · Grading & drainage correction · Base preparation and compaction · Custom interlocking and natural stone
· Retaining wall construction · Landscape lighting · Full-property design and build

Trusted by homeowners, builders, and property managers alike.

Petra Landscaping has built a reputation on consistency and reliability. Much of our growth comes from referrals — a reflection of the trust our clients place in us, and a responsibility we take seriously.

CITIES SERVED

Everything your property needs, **done right.**

Ten services, one accountable team. Design, build, and year-round care under a single point of contact.

01 **Interlocking & Paving**

Driveways, patios, and walkways in premium pavers and natural stone, precision-laid to survive every Ontario winter.

02 **Landscape Design & Build**

Full-property transformations from concept to finished build, designed around how you actually live outdoors.

03 **Retaining Walls**

Structural and decorative walls engineered for Ontario soil, in natural stone, block, or armour stone.

04 **Sod & Turf Installation**

Proper grading, soil preparation, and fresh sod for an instant, healthy, green lawn.

05 **Garden Design & Planting**

Custom garden beds, planting plans, trees, and shrubs selected to thrive through every season.

Through **every** Ontario season.

06 Artificial Grass

Low-maintenance, year-round green with premium turf — ideal for backyards, pet runs, and commercial sites.

07 Decks & Fences

Custom cedar fences, composite decks, and privacy screens built for Ontario weather.

08 Lawn Care & Property Maintenance

Year-round residential and commercial upkeep: mowing, fertilization, garden care, and seasonal cleanups.

09 Excavation & Grading

Site preparation, drainage correction, and grading that sets every landscape project up to last.

10 Seasonal Cleanup & Snow Removal

Spring and fall cleanups plus reliable winter plowing, salting, and sidewalk clearing across the GTA.

Not sure which service your project needs? Book a free on-site estimate and we will walk the property with you, flag anything structural, and scope it honestly.

08 — FEATURED PROJECT

Project King

A full rear-yard build combining a large-format interlock terrace, integrated lighting throughout, and a custom water feature as the focal point. Base preparation and drainage were engineered first so the surface stays level and free-draining through freeze-thaw.

SCOPE

- 5,000+ sq ft of interlock
- 50+ integrated lights
- Custom water feature
- Full drainage & base build

08 — FEATURED PROJECT

Project George

A sloped property brought back into usable, level living space. Over one hundred linear feet of retaining wall holds the grade, with interlocking terraces, planted garden beds, and a water feature layered in above it.

SCOPE

- 100+ linear ft of retaining walls
- 1,000+ sq ft of interlocking
- Garden beds & planting
- Water feature

08 — FEATURED PROJECT

Project Alliston

A front-to-back property remodel. The driveway was fully re-excavated and interlocked, custom walkways were run to the entry and side yards, and landscape lighting was set into the steps and beds to carry the design after dark.

SCOPE

- Full driveway interlocking
- Custom walkways
- Landscape lighting
- Backyard remodel

We build for **Canadian seasons**, not summer photos.

We focus on structural integrity just as much as surface appearance. Proper grading and drainage are not optional — they are what the finish sits on.

A PROPERLY BUILT BASE

Paver surface

Laid to pattern, cut and locked at edges

Bedding layer

Screeded to a consistent depth

Compacted granular base

Built in lifts, compacted in stages

Separation layer

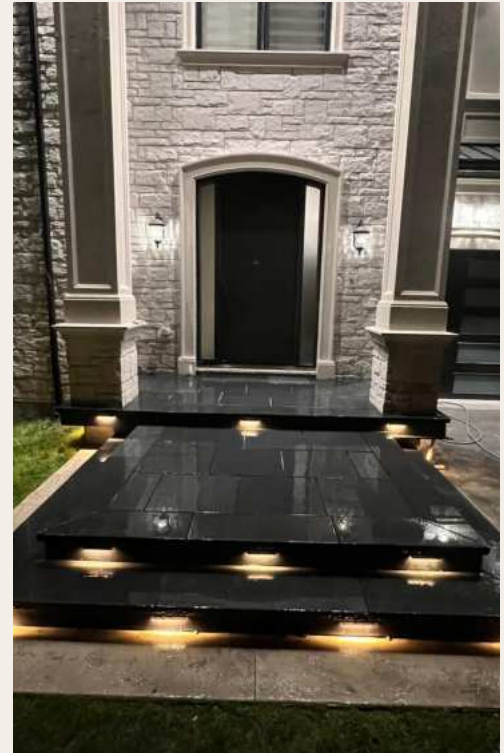

Keeps base and subgrade from mixing

Prepared subgrade

Excavated, graded to fall, proof-rolled

Depths and materials are specified per project, based on soil conditions, drainage, and expected load.

A well-built landscape protects your property from:

- Improper water runoff
- Foundation pressure
- Soil erosion
- Premature settling

Outdoor spaces should be more than decorative. They should drain properly after heavy rainfall, withstand freeze-thaw cycles, and stay level and structurally sound — on a compact residential lot or a large custom estate.

Premium materials, 19+ cities.

Most of our work comes by referral.

“Petra Landscaping was a pleasure to work with. Jacob has fantastic positive energy and is very creative with design. We were most impressed with his continued communication throughout the whole project. We love the work that was done, and we’re pleased that Jacob will be back in the spring to complete a couple more projects for us. We would recommend Petra Landscaping to friends and family.”

HOMEOWNER · GREATER TORONTO AREA

“We had a very old, sunken driveway. Petra transformed it completely into something new and innovative for me and my family, exactly as promised and right on schedule. All we can say is thank you to the Petra Landscaping team for this incredible job.”

HOMEOWNER · DRIVEWAY REPLACEMENT

“Special thanks for the punctual appointments, the quality of work, and the experience I noticed in the details and in the way the job was managed — without us feeling any kind of disturbance. The work was perfect to a very high degree. Your company was wonderful and the results made me very happy. Thanks again.”
